

10 FEBRUARY 2010

FOR IMMEDIATE RELEASE

THE ALL NEW ŠKODA SUPERB COMBI VOTED LUXURY CAR OF THE YEAR BY TOPGEAR, FEBRUARY 2010

Following last year's success of the Škoda Superb, Škoda has once again come up with the perfect combination of elegance and space – the Superb Combi, targeted to be launched in April.

Our new top-notch model is an ideal combination of elegance and space. On one hand, it is based on the very best features of our flagship, the Superb with the patented rear TwinDoor, which has a distinctive style, elegant contours and airy interior. On the other hand, it draws on the long-standing tradition of Škoda estate cars, which have set the standard for generous carrying capacity and smart solutions in the luggage compartment.

Equipped with a 1.8 TSI engine and 7-speed DSG, this turbocharged four-cylinder engine has power of 118 kW with a wide range of revolutions from 5,000 to 6,200 rpm, and is currently the most powerful petrol engine for front-wheel drive cars. The maximum torque of 250 Nm is available in an unprecedented broad band of revolutions from 1,500 to 4,200 rpm, guaranteeing excellent dynamism and user-friendly operation without the need for frequent gear changes. The high torque at low revolutions (165 Nm at 1,000 rpm) also contributes to the very good combined consumption of 7.6 l of lead-free petrol with an octane rating of 95 per 100 km.

With an unparalleled volume of 633 litres for the luggage compartment and 1,865 litres with the rear seats folded down, the new Superb Combi makes an ideal car for every driver who requires a comfortable, reliable car in all circumstances. The new model offers customers what they have become used to in Škoda cars: a spacious, practical interior, outstanding value and timeless design.

The new Superb Combi comes packed with features that include Parallel Parking Assistance, Columbus navigation system with DVD player, bi-xenon headlights with Adaptive Frontlight System, cruise control, 18" sports rims, tinted rear window, sunscreen for rear side windows, bluetooth telephony, integrated headlight washers and many more.

New to the Škoda brand is the electric operated tailgate. What makes this extremely convenient feature so useful is the automatic opening and closing of the tailgate, preventing drivers from getting their hands dirty. This piece of equipment is delivered with an automatic release for the luggage compartment roll-up cover

Another worth mentioning feature is the panoramic roof. The external dimensions of the roof module are 1,364 mm in length and 870 mm in width. The sunroof consists of two parts: the front section is a tilting and sliding panel powered by an electric motor, while the rear section is fixed in place. When the sunroof slides back, a wind deflector slides forwards to reduce the noise of flowing air and direct air flow into the interior. Both parts are glazed with tinted glass to guarantee maximum interior comfort, ensuring that less light (approximately 88 %) and heat (about 90 %) penetrate the interior of the car.

Priced at \$129,800, the Superb Combi is available for booking now.
